ELSEVIER International Journal of Mass Spectrometry and Ion Processes 157/158 (1996) 407–410

International Journal of Mass Spectrometry and Ion Processes

Subject index

193 nm
193 nm photodissociation of larger multiply-charged biomolecules 357

α-Distonic ions
Deprotonation of α-distonic ions. Proton affinities of the α-radicals 275

α-Radicals
Deprotonation of α-distonic ions. Proton affinities of the α-radicals 275

Actinides
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265

Activation energy
On the dissociation and conformation of gas-phase methonium ions 305

Alkali ions
Infrared multiphoton dissociation of electrosprayed crown ether complexes 365

Appearance energy
The geometrical factor of infinitely long cylindrical ICR cells for collision energy-resolved mass spectrometry: appearance energies of EI_2^+ (E = P, As, Sb, and Bi) from collision-induced dissociation of EI_3^+ and $[EI_2 \cdot \text{ligand}]^+$ complexes 233

Biomolecules
Ultrahigh-resolution Fourier transform mass spectrometry of biomolecules above m/z 5000 175

BIRD
On the dissociation and conformation of gas-phase methonium ions 305

Bond dissociation energy
Bond dissociation energy of the radical cation dimers of diethyl sulfide, di-*n*-propyl sulfide and di-*n*-butyl sulfide 283

Bond energies
Experimental and theoretical studies of $FeC_7H_7^+$ isomers: Fe^+–C_7H_7 bond energies and isomeric differentiation 249

Charged vanadium clusters
Chemisorption of hydrogen on charged vanadium clusters 319

Chemisorption
Chemisorption of hydrogen on charged vanadium clusters 319

Collective motion
Collective motion of ions in an ion trap for Fourier transform ion cyclotron resonance mass spectrometry 85

Collision induced dissociation
A dual vacuum chamber Fourier transform mass spectrometer with rapidly interchangeable FAB, MALDI and ESI sources: electrospray results 115
The geometrical factor of infinitely long cylindrical ICR cells for collision energy-resolved mass spectrometry: appearance energies of EI_2^+ (E = P, As, Sb, and Bi) from collision-induced dissociation of EI_3^+ and $[EI_2 \cdot \text{ligand}]^+$ complexes 233

Coulomb interaction
Collective motion of ions in an ion trap for Fourier transform ion cyclotron resonance mass spectrometry 85

Cyclopropane radical cation
The r.f.-only-mode event for ion-chemistry studies in Fourier transform mass spectrometry: the reactions of propene and cyclopropane radical cations with neutral ethene 189

Cyclotron resonance mass spectrometry
The non-neutral plasma: an introduction to physics with relevance to cyclotron resonance mass spectrometry 39

$C_7H_7^+$
Time-resolved photodissociation of *p*-bromotoluene ion as a probe of ion internal energy 345

Density functional theory
Mass spectrometry and density functional studies of neutral and anionic tin clusters 329

Deprotonation
Deprotonation of α-distonic ions. Proton affinities of the α-radicals 275

Diethyl sulfides
Bond dissociation energy of the radical cation dimers of diethyl sulfide, di-*n*-propyl sulfide and di-*n*-butyl sulfide 283

Dispersants
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379

Dissociation
On the dissociation and conformation of gas-phase methonium ions 305
Distonic ion
The radical cation of trimethylphosphine oxide 293

Electron beam ion trap
FTICR analysis of the magnetic trapping mode of the electron beam ion trap 149
Electron–ion reaction
FT-ICR spectrometry with simultaneous trapping of positive and negative ions 199
Electrospray
A dual vacuum chamber Fourier transform mass spectrometer with rapidly interchangeable FAB, MALDI and ESI sources: electrospray results 115
On the dissociation and conformation of gas-phase methonium ions 305
193 nm photodissociation of larger multiply-charged biomolecules 357
Element–organic
The geometrical factor of infinitely long cylindrical ICR cells for collision energy-resolved mass spectrometry: appearance energies of EI_2^+ (E = P, As, Sb, and Bi) from collision-induced dissociation of EI_3^+ and $[EI_2 \cdot ligand]^+$ complexes 233
Excitation methods
Stored waveform inverse Fourier transform (SWIFT) ion excitation in trapped-ion mass spectrometry: theory and applications 5
Experimental design
FT-ICR spectrometry with simultaneous trapping of positive and negative ions 199
External ion source
Rapid microscale analyses with an external ion source Fourier transform ion cyclotron resonance mass spectrometer 391

Fast scanning ICR spectrometers
A historical note on an unrecognized early stage of the development of fast scanning ion cyclotron resonance spectrometers: the resotron 1
$FeC_7H_7^+$
Experimental and theoretical studies of $FeC_7H_7^+$ isomers: Fe^+–C_7H_7 bond energies and isomeric differentiation 249
Fluorinated surfactants
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379
Fourier transform ion cyclotron resonance
193 nm photodissociation of larger multiply-charged biomolecules 357
Fourier transform ion cyclotron resonance mass spectrometry
Mass spectrometry and density functional studies of neutral and anionic tin clusters 329
Fourier transform mass spectrometry
A dual vacuum chamber Fourier transform mass spectrometer with rapidly interchangeable FAB, MALDI and ESI sources: electrospray results 115
Infrared multiphoton dissociation of electrosprayed crown ether complexes 365
Frequency shift
Collective motion of ions in an ion trap for Fourier transform ion cyclotron resonance mass spectrometry 85
FT-ICR
Experimental methods to alleviate ion coupling effects in matrix-assisted laser desorption ionization Fourier transform ion cyclotron resonance mass spectrometry 163
FTICR analysis of the magnetic trapping mode of the electron beam ion trap 149
Experimental and theoretical studies of $FeC_7H_7^+$ isomers: Fe^+–C_7H_7 bond energies and isomeric differentiation 249
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265
Deprotonation of α-distonic ions. Proton affinities of the α-radicals 275
Bond dissociation energy of the radical cation dimers of diethyl sulfide, di-*n*-propyl sulfide and di-*n*-butyl sulfide 283
Rapid microscale analyses with an external ion source Fourier transform ion cyclotron resonance mass spectrometer 391
FT-ICR cell design
Ion motion in a Fourier transform ion cyclotron resonance wire ion guide cell 129
FT-ICR spectrometry
The geometrical factor of infinitely long cylindrical ICR cells for collision energy-resolved mass spectrometry: appearance energies of EI_2^+ (E = P, As, Sb, and Bi) from collision-induced dissociation of EI_3^+ and $[EI_2 \cdot ligand]^+$ complexes 233
FTMS
Collective motion of ions in an ion trap for Fourier transform ion cyclotron resonance mass spectrometry 85
On the dissociation and conformation of gas-phase methonium ions 305

Gas phase chemistry
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265

Historical development
A historical note on an unrecognized early stage of the development of fast scanning ion cyclotron resonance spectrometers: the resotron 1
Host–guest interactions
Infrared multiphoton dissociation of electrosprayed crown ether complexes 365
Hydrocarbon activation
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265
Hydrogen
Chemisorption of hydrogen on charged vanadium clusters 319

ICR mass spectrometry
FT-ICR spectrometry with simultaneous trapping of positive and negative ions 199
Infrared multiphoton dissociation
Infrared multiphoton dissociation of electrosprayed crown ether complexes 365
Instrumentation
A dual vacuum chamber Fourier transform mass spectrometer with rapidly interchangeable FAB, MALDI and ESI sources: electrospray results 115
Analysis of harmonics for an elongated FTMS cell with multiple electrode detection 215
Ion coupling
Experimental methods to alleviate ion coupling effects in matrix-assisted laser desorption ionization Fourier transform ion cyclotron resonance mass spectrometry 163
Ion cyclotron resonance
Stored waveform inverse Fourier transform (SWIFT) ion excitation in trapped-ion mass spectrometry: theory and applications 5
Analysis of harmonics for an elongated FTMS cell with multiple electrode detection 215
Ion cyclotron resonance crown ethers
Infrared multiphoton dissociation of electrosprayed crown ether complexes 365
Ion detection
A 4.7 Tesla internal MALDI-FTICR instrument for high mass studies: performance and methods 97
Ion motion
Ion motion in a Fourier transform ion cyclotron resonance wire ion guide cell 129
Ion thermometry
Time-resolved photodissociation of *p*-bromotoluene ion as a probe of ion internal energy 345
Ion trapping
A 4.7 Tesla internal MALDI-FTICR instrument for high mass studies: performance and methods 97
Ion–ion reaction
FT-ICR spectrometry with simultaneous trapping of positive and negative ions 199
Isomeric differentiation
Experimental and theoretical studies of $FeC_7H_7^+$ isomers: Fe^+–C_7H_7 bond energies and isomeric differentiation 249
Isomerization
The radical cation of trimethylphosphine oxide 293

Kinetic energy
A dual vacuum chamber Fourier transform mass spectrometer with rapidly interchangeable FAB, MALDI and ESI sources: electrospray results 115

Laser ablation
Mass spectrometry and density functional studies of neutral and anionic tin clusters 329
Laser desorption Fourier transform in cyclotron resonance mass spectrometry
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379

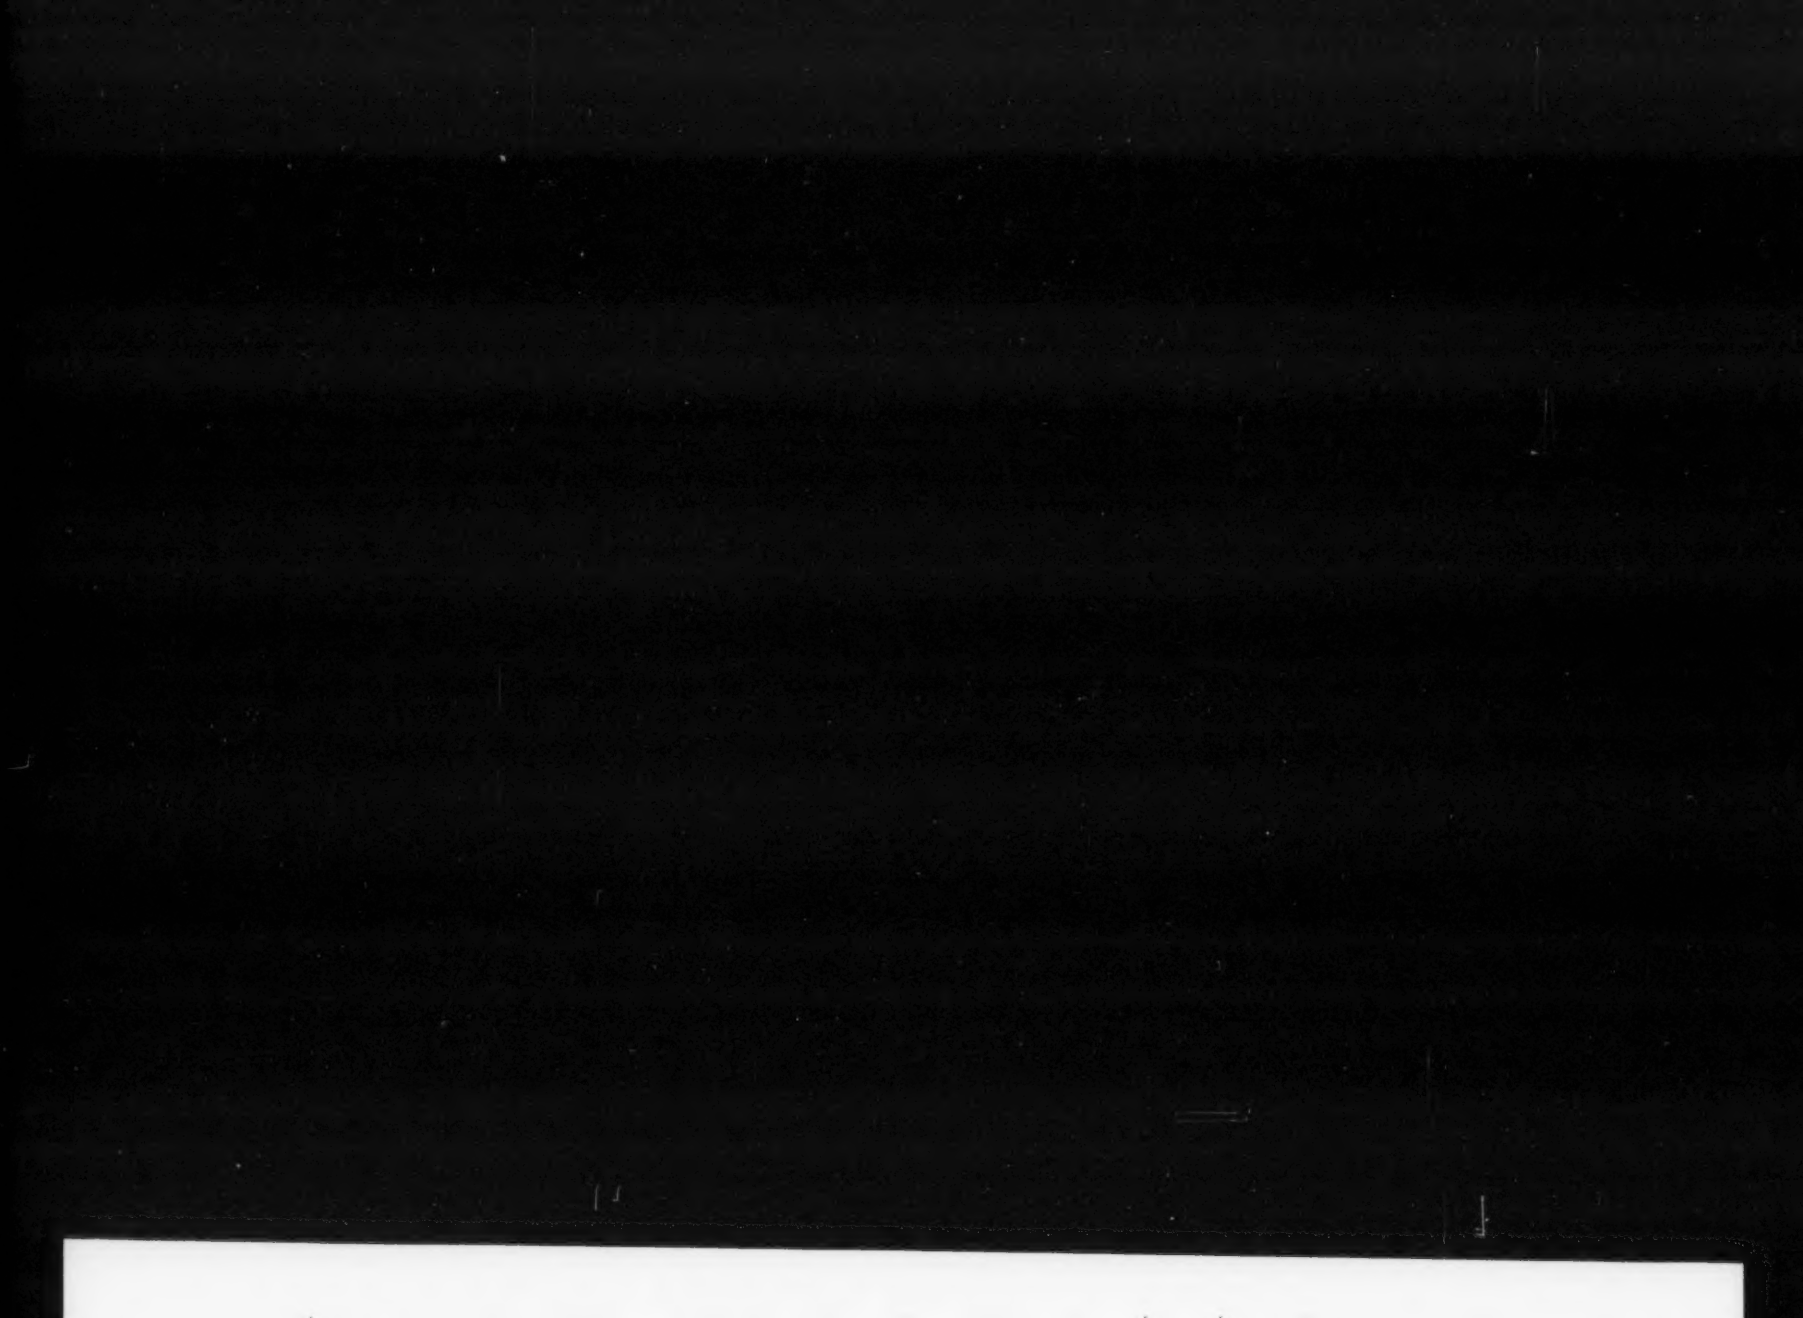
Magnetic trapping mode
FTICR analysis of the magnetic trapping mode of the electron beam ion trap 149
MALDI
Experimental methods to alleviate ion coupling effects in matrix-assisted laser desorption ionization Fourier transform ion cyclotron resonance mass spectrometry 163
Ultrahigh-resolution Fourier transform mass spectrometry of biomolecules above m/z 5000 175
Rapid microscale analyses with an external ion source Fourier transform ion cyclotron resonance mass spectrometer 391
MALDI FTICR instrument
A 4.7 Tesla internal MALDI-FTICR instrument for high mass studies: performance and methods 97
Maleinized olive oil
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379
Mass studies
A 4.7 Tesla internal MALDI-FTICR instrument for high mass studies: performance and methods 97
Methane activation
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265

Methyl ether styrene macromonomers
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379
Microscale analysis
Rapid microscale analyses with an external ion source Fourier transform ion cyclotron resonance mass spectrometer 391

Neutral ethene
The r.f.-only-mode event for ion-chemistry studies in Fourier transform mass spectrometry: the reactions of propene and cyclopropane radical cations with neutral ethene 189
Non-neutral plasma physics
The non-neutral plasma: an introduction to physics with relevance to cyclotron resonance mass spectrometry 39

p-Bromotoluene
Time-resolved photodissociation of *p*-bromotoluene ion as a probe of ion internal energy 345
Peak coalescence
Collective motion of ions in an ion trap for Fourier transform ion cyclotron resonance mass spectrometry 85
Photodissociation
193 nm photodissociation of larger multiply-charged biomolecules 357
Photoionization charge-transfer
Time-resolved photodissociation of *p*-bromotoluene ion as a probe of ion internal energy 345
Poly(ethylene oxide)
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379
Post-transition elements
The geometrical factor of infinitely long cylindrical ICR cells for collision energy-resolved mass spectrometry: appearance energies of EI_2^+ (E = P, As, Sb, and Bi) from collision-induced dissociation of EI_3^+ and $[EI_2 \cdot ligand]^+$ complexes 233
Propene radical cation
The r.f.-only-mode event for ion-chemistry studies in Fourier transform mass spectrometry: the reactions of propene and cyclopropane radical cations with neutral ethene 189
Proton affinities
Deprotonation of α-distonic ions. Proton affinities of the α-radicals 275

R.f.-only-mode event
The r.f.-only-mode event for ion-chemistry studies in Fourier transform mass spectrometry: the reactions of propene and cyclopropane radical cations with neutral ethene 189
Radical cation
The radical cation of trimethylphosphine oxide 293
Radical cation dimers
Bond dissociation energy of the radical cation dimers of diethyl sulfide, di-*n*-propyl sulfide and di-*n*-butyl sulfide 283
Resotron
A historical note on an unrecognized early stage of the development of fast scanning ion cyclotron resonance spectrometers: the resotron 1

Tetrafluoroethylene–ethylene oxide block polymers
The characterization of novel dispersants, fluorinated surfactants, and modified natural oils by laser desorption Fourier transform ion cyclotron resonance mass spectrometry (LD-FTICR-MS) 379
Theory
Analysis of harmonics for an elongated FTMS cell with multiple electrode detection 215
Thorium ions
Gas phase actinide ion chemistry: activation of alkanes and alkenes by thorium cations 265
Three-electron two center bond
Bond dissociation energy of the radical cation dimers of diethyl sulfide, di-*n*-propyl sulfide and di-*n*-butyl sulfide 283
Time-resolved photodissociation
Time-resolved photodissociation of *p*-bromotoluene ion as a probe of ion internal energy 345
Tin clusters
Mass spectrometry and density functional studies of neutral and anionic tin clusters 329
Trajectory calculations
FT-ICR spectrometry with simultaneous trapping of positive and negative ions 199
Trapped ion mass spectra
Stored waveform inverse Fourier transform (SWIFT) ion excitation in trapped-ion mass spectrometry: theory and applications 5
Trimethylphosphine oxide
The radical cation of trimethylphosphine oxide 293


Ultrahigh-resolution Fourier transform mass spectrometry
Ultrahigh-resolution Fourier transform mass spectrometry of biomolecules above *m/z* 5000 175
